Be a part of the inaugural Recovery Innovation Technology Summit (RITS 2023), a diverse assembly of academics, independent scholars, and non-profit recovery and identification groups devoted to researching cold cases and innovating technologies that contribute to the recovery of our missing.

The summit, organized and hosted by the UW MIA Recovery and Identification Project, will create a networking opportunity for interdisciplinary groups and scholars who do similar work. The summit will welcome participation from researchers and individuals, who focus on the recovery of missing individuals.

Your participation will support the efforts to build and grow this network of experts in the hopes of creating collaborations that will enhance the recovery of missing individuals.

An Opportunity to Connect

- Meet face to face with existing and potential customers
- Meet potential collaborators for future projects
- Reach attendees via live and digital advertising opportunities
- Present to a focussed group of both academic and non-academic attendees
- Demo your products
The UW MIA Recovery & Identification Project

The UW MIA Project works to recover, identify, and repatriate MIA U.S. service members by conducting annual field excavations and year-round research assistance to families of missing service members. The project consists of an interdisciplinary team of academic experts and student volunteers in the fields of history, archaeology, forensic anthropology, biology, GIS, aquatic and terrestrial archaeology, geophysics, and other backgrounds collaborating to make these missions possible and to make these missions a success.

Dr. Sarah Wagner, Keynote Speaker

Sarah Wagner is a Professor of Anthropology at George Washington University. She is the author of To Know Where He Lies: DNA Technology and the Search for Srebrenica’s Missing (2008) and What Remains: Bringing America’s Missing Home from the Vietnam War (2019), winner of the 2020 Victor Turner Prize for Ethnographic Writing. She is also co-author of Srebrenica in the Aftermath of Genocide (2014) and co-editor of the Cambridge Handbook of the Anthropology of Death (forthcoming). Funded by the National Science Foundation, National Endowment of the Humanities, and the Wenner-Gren Foundation and awarded a Guggenheim Fellowship, her research focuses on post-conflict societies, memory, forensic science applied in the wake of war, and, most recently, on COVID-19 death and mourning. In addition to her scholarly publications, she has written opinion editorials and blog posts for the Washington Post, The Hill, Baltimore Sun, and LA Times.
